

**Amendments to the Claims:**

1. (Previously Presented) In a transaction involving a disclosure of confidential information by first parties to second parties, requiring the second parties to have adopted security measures with respect to the handling of the information and periodically respond to requests of the first parties for assurances of the adoption, implementation and observance of the security measures by the second party, a method for providing such assurances to the first parties, comprising:

arranging by a third party with a selected number of the second parties to acquire, compile and store in a database of said third party, information regarding the adoption, implementation and observation of security measures for each of the selected number of second parties;

arranging by said third party with a selected number of the first parties subscription services providing the selected number of first parties with assurances of the security measures of the selected number of second parties upon request; and

providing by said third party the assurances of the security measures of the selected number of second parties to the selected number of first parties upon request.

2. (Previously Presented) The method according to claim 1 further including updating the security measures information stored in the database of said third party for each second party periodically.

3. (Previously Presented) The method according to claim 1 further including updating the security measures information stored in the database of said third party upon a notification by a respective second party and verification by a third party.

4. (Previously Presented) The method according to claim 1 wherein the acquisition, compilation and storage of the security measures information of the selected number of second parties by said third party is performed at no cost to the selected number of second parties.

5. (Previously Presented) The method according to claim 1 including rendering the subscription services of said third party for a fee.

6. (Currently Amended) The method according to claim 1 further including providing by said third party a rating for each second party based upon a type of the confidential information and the security measures of ~~the vendor~~ said second party .

7. (Previously Presented) The method according to claim 1 further including providing a rating by said third party for each second party based upon the security measures of the second party.

8. (Previously Presented) A method for providing security information on a plurality of vendors to a plurality of clients, comprising:

providing an assessment of security procedures adopted, implemented and observed for each of the plurality of vendors;

storing each assessment in a vendor security database; and

providing access to the vendor security database to each client to allow each client to review the plurality of assessments.

9. (Original) The method according to claim 8 wherein the assessment is provided at cost to the vendor.

10. (Previously Presented) The method according to claim 8 wherein the assessment is provided for a fee to the vendor.

11. (Original) The method according to claim 8 wherein the assessment is provided at no cost to the vendor.

12. (Previously Presented) The method according to claim 8 wherein the access provided to each client is pursuant to the rendering of subscription services for a fee.

13. (Original) The method according to claim 8 wherein the assessment is updated periodically.

14. (Previously Presented) The method according to claim 8 wherein the assessment is updated whenever the vendor updates its security procedures, the updates are verified and provided to the database.

15. (Original) The method according to claim 8 wherein each assessment comprises one or more of SAS70 reports, Penetration Reports, Information Security Policies, Computer Incident Response Policies, DR Plans, Business Resumption Plans, Insurance Coverages, 3<sup>rd</sup> Party Vendor Management Policies & Programs and Annual Financial Reports.

16. (Original) The method according to claim 8 further including providing a rating for each vendor based upon a type of information to be protected and the security procedures of the vendor.

17. (Original) The method according to claim 8 further including providing a rating for each vendor based upon the security procedures of the vendor.

18. (Previously Presented) A method of providing assurance to one of a number of first party entities that one of a number of second party entities to which said one first party entity contemplates the disclosure of certain confidential information, has adopted, implemented and observed certain security measures with respect tot the handling of confidential information, comprising:

arranging with at least one of said second party entities to acquire therefrom, compile and store in a database, by a third party entity, verification regarding the adoption, implementation and observation of security measures in the handling of confidential information of at least one of said first party entities;

arranging with at least one of said first party entities, a subscription service providing said one first party entity with assurance of the adoption, implementation and observance of the security measures of said one second party, by said third party, upon request, upon request of said one first party entity; and

providing the requested assurances by said third party to said one first party in response to said request.
